

Responsible 3TG Minerals Sourcing Policy

Our company TALLADIUM ESPAÑA S.L and GEODA MEDICAL S.L under the brand DYNAMIC ABUTMENT SOLUTIONS is committed to ensuring that the materials used in the design and manufacture of its products are sourced in a responsible, ethical, and legally compliant manner.

This policy is established in accordance with the principles of responsible supply chain management and the applicable European legislation, Regulation (EU) 2017/821 on minerals originating from conflict-affected and high-risk areas.

The so-called conflict 3TG minerals include:

- Tin (Sn)
- Tantalum (Ta)
- Tungsten (W)
- Gold (Au)

The products manufactured by the company do not contain the conflict minerals listed above.

The main materials used in our products are:

- Titanium (Ti)
- Cobalt-Chromium (Co-Cr)
- Stainless Steel AISI (Fe-Cr-C)
- Neodymium (Nd)
- PEEK (Polyether Ether Ketone)
- POM (Polyoxymethylene)
- PSU (Polyphenylsulfone)

Although the materials used in our products do not include conflict minerals, the company remains committed to responsible sourcing and undertakes to:

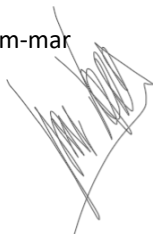

- Work with suppliers that comply with applicable legal and ethical requirements.
- Request information from suppliers regarding the composition and origin of materials when necessary, using the IPC-1755 / CMRT document.

This policy will be reviewed periodically to ensure its adequacy with current legislation, the best international practices, and the requirements of the company's quality management system.
