Research & Development

Always ready to be trendsetters

Our main purpose is to keep leading the way in angled systems, that is why our research and innovation in prosthetic solutions are our hallmarks.

The proximity to professional needs and the innovative philosophy of our brand allow our technical team to be at the cutting edge of the sector. When developing the product, we give priority to product output, ease of use and improvement in terms of the aesthetic result.

Research and development of new products have been our main objectives. This enabled us to create innovative projects responding to sector needs.

The result (in the shape of numerous patents presented by our R&D&I Department) has been new products launched onto the market, fruit of work done in our R&D&I department and a good working relationship with the best people and leading companies in the sector that, like Dynamic Abutment® Solutions, champion research and development.

Dynamic Abutment Solutions: always ready to be trendsetters. That is why we have started our **Production Center**: our own production center which allows us to rapidly create prototypes for new products and undertake applied research into new technologies.

The UNE-166002 certified R&D&I Centre ensures an exhaustive control of all the developmental stages for new projects. This enables these projects to turn into new products to the benefit of our clients as rapidly as possible and under the highest levels of safety and quality.

Quality Center

Dynamic Abutment Solutions features significant resources to ensure our clients receive products in the very best quality and safety guaranteed.

It has the latest marking, control and measurement equipment, in addition to specific features to effect physical-chemical treatments on our products .

Our presence in international markets means we have the mandatory healthcare certificates supporting our medical devices: CE marking, CMD/CAS standards and FDA certificates.

One of our primary commitments is the guarantee that the devices which we make available to our clients fully meet all healthcare regulations.

Our primary concern from the very beginning has been the quality and safety of our products: UNE-EN ISO 9001:2015 , UNE-EN ISO 13485:2016, and UNE 166002:2014

The Quality Center has an ISO-8 clean room

International Customer Service

At Dynamic Abutment Solutions we are very proud to offer an excellent customer service. Our aim is to establish constant communication with our international distributors and partners. We offer instant replies and solutions, answers to your queries, and provide technical advice for more complex cases.

Our international department also offers support to register our products in other countries.

Direct contact with and suggestions from our clients allow us to continuously improving the quality of the products and services we offer on a daily basis.

Participation in events, exhibitions and trainings

Dynamic System

more than
100.000 cases
resolved by
Dynamic System

The Screwdriver set of 3.0 Dynamic Abutment System is used in those cases in which rectification of the entry of the screw due to an unfavorable position of the implants is necessary, improving the functionality and aesthetics of the milled prosthesis.

Dynamic Screwdriver

Screwdriver with hexalobular head, exclusively to the 3.0 Dynamic Abutment system; lengths: 18, 24, 32mm. Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

Dynamic Screws

They cover all the tread metrics available on the market. They are used with the 3.0 Dynamic Abutment, the 3.0 Dynamic TiBase® or milled structures with an angled screw channel of up to 30°. There are several lengths for each metric to ease adaptation to the structures. All of them are made of grade 5 titanium

All screws are perfectly identified with their batch and reference numbers, which allow each and every screw to be traced and recorded in the patient's card and in the clinical or laboratory records. Only the 3.0 dynamic screwdriver must be used to fix them.

3.0 Dynamic Abutment

Our unique and exclusive 3.0 Dynamic Abutment System has stirred the implantology sector, as it achieves a screw-retained prosthesis even if the implants have been placed inaccurately and its functionality is no longer affected nor its aesthetics compromised. It is an outstanding alternative to titanium fix angled cement-to abutments and individual dies made by the technician.

Our abutments provide a perfect adjustment to avoid any modification on the prosthetic connection geometry with the implant during the prosthesis production.

Machined abutments

Cast-to Dynamic Abutment 3.0 with Cobalt-Chrome milled base.

Abutment with milled Cobalt-Chrome base and castable chimney. It must be cast in Cobalt-Chrome alloy.

Castable 3.0 Dynamic Abutment

Fully castable abutment. It is produced with sanitary plastic POM of the highest quality. It can be cast in any alloy used in the laboratory.

Total freedom of movement

The Dynamic Abutment consists of two pieces connected by an elbow. The elbow connection works as a joint to offer the chimney a full 360° rotation and angle correction up to 28°.

Our Dynamic Abutment is a revolutionary solution as it gives technicians total freedom of movement and, at the same time, allows angle correction. It simplifies the prosthetic work and, what is more important, provides solutions.

Example of use

Dynamic Abutment in a model.
Image A: with no angle correction.
Image B: with angle correction. The screw entry is now in a palatal position.
Article published in "The Journal of prosthetic dentistry" (June 2015).
By: Eva Berroeta

Security & Traceability

All of our products are **patented** and manufactured under very strict quality guidelines.

With the 3.0 Dynamic System, we provide a **card for the patient** and **labels** for the laboratory and the clinic to identify the position in Dynamic System is located.

We exercise complete control over the traceability of our products to fulfil the current health legislation.

This helps repositioning the material and inform about the importance of using the appropriate tools when handling the Dynamic System components.

Exclusivity

All of our products are marked during the manufacturing process to ensure the exclusivity of each piece and control traceability.

This logo is exclusive to Dynamic Abutment Solutions and guarantees the products are original and have successfully achieved the highest quality standards in our Quality Center.

COMPLEMENTS

Manual handle

Made of stainless steel.
They are used to connect screwdriver bits with the contra-angle connection

Large manual handle for laboratory

Ref. 49.601.000.03-2
Ideal to manipulate models in the laboratory.
Length 55.65mm.

Manual handle for clinic

Ref. 49.601.000.01-2
Clinic handle: used to position the prosthesis in the mouth prior to torque control in the clinic. Length: 15.65mm.

Universal manual torque wrench prosthetic

Ref. 11.990.990.07-2

Torque wrench.
4mm square connection. Torque 10-35N.c

Manual torque wrench adapter prosthetic

Piece to connect the screwdriver with contra-angle connection to the torque wrench.

Universal Manual torque wrench adapter

Ref. 49.604.000.05-2
4mm Square connection

Straumann Manual torque wrench adapter

Ref. 49.604.000.07-2
Straumann connection

Nobel Biocare Manual torque wrench adapter

Ref. 49.604.000.08-2

ANALOGS

Stainless steel implant analog. It reproduces the implant connection

PROSTHETIC REAMER

The casting process of the castable cylinders generates imperfections in the final metallic structure. In order to minimize the consequences generated by this process, we have designed a line of tools to correct the base of the cylinder, improving the interior of the chimneys and the adjustment to the implant.

Set of handle and reamer

Ref. 49.604.000.03.2

Chimney Reamer

Base Reamer

TALLADIUM GUARANTEE

TERMS AND CONDITIONS

These guarantee terms and conditions ("T&C") cover the entire range of Talladium products ("Products"), manufactured by TALLADIUM ESPAÑA S.L. and distributed by Geoda Medical S.L. or official dealers. The guarantee described in these T&C is exclusively in benefit of the clinician ("Clinician") and of the dental technician ("Technician") and not for the benefit of third parties or institutions, including patients.

GUARANTEE PERIOD

TALLADIUM ESPAÑA S.L. offers a lifelong guarantee for its entire range of products starting from the date of issue of the invoice.

GUARANTEE SCOPE

Subject to the limitations and exceptions described in these T&C, TALLADIUM ESPAÑA S.L. will offer the following benefits:

QUALITY: If there are defects in the materials or in the manufacturing of the Product, TALLADIUM ESPAÑA S.L. will replace the Product with no additional cost.

SAFETY: If, having complied with all the product indications, the prosthesis should have to be made again, due to a fault in the Dynamic Abutment® or Dynamic Titanium Base® system, TALLADIUM ESPAÑA S.L. will replace the abutments and screws necessary to remake the prosthesis, as well as the costs derived from its manufacturing.

In case of having used our products and having complied with all the product indications, the implants suffer any damage, TALLADIUM ESPAÑA S.L. will pay the cost of the implants. This coverage will only be valid during the first 6 months after the collocation of the prosthesis which includes our products.

CLAIM REQUIREMENTS AND PROCEDURE

To receive the benefits indicated in these T&C, the treating Clinician must satisfy the following requirements:

- The claim must be notified to TALLADIUM ESPAÑA S.L. within (30) days since the date the claimed defect was detected.
- This requires that the Clinician or Technician must contact the customer service department by telephone or by e-mail to make the claim.
- A claim form will be completed, which, together with a document or report which justifies the faulty Product and the faulty Product itself, will be sent by the customer to TALLADIUM ESPAÑA S.L. offices, within the previously indicated period.
- Clinicians or Technicians presenting a claim in agreement with these T&C must be up to date in any payments owing to TALLADIUM ESPAÑA S.L. or to any of its subsidiaries, at the time when the claim form is presented.
- All the use procedures of our Products must be carried out in agreement with the instructions of TALLADIUM ESPAÑA S.L. as well as in accordance with commonly accepted dentistry practices.
- The expenses derived from this procedure will be assumed by the customer. The return shipping costs will be assumed by TALLADIUM ESPAÑA S.L. in all those cases covered by these T&C.

Regardless of the guarantee rights, claims should be notified as soon as possible in order to comply with regulatory requirements.

GENERAL LIMITATIONS OF THIS GUARANTEE

With the exception of the guarantee described in these T&C, neither TALLADIUM ESPAÑA S.L. nor its representatives, nor third parties manufacturing or distributing the Products, represent or offer a guarantee, agreement or any other express or implicit, oral or written, commitment, with respect to the Products (without limitation), including guarantees involved in the marketing, durability or suitability for individual uses or purposes.

In addition and within the maximum extent permitted by the relative law, TALLADIUM ESPAÑA S.L. rejects (on its own behalf, and on behalf of its representatives and third parties that manufacture or distribute Products) any responsibility with respect to any direct or indirect damage caused, which may result from or be a consequence of the design, composition of the dental prosthesis into which the Products are integrated.

GUARANTEE EXCLUSIONS

TALLADIUM ESPAÑA S.L. limits this guarantee to:

- Transformed abutments that form part of the dental prosthesis. But not the screws used to anchor them.
- Problems derived from the use of laboratory screws for the definite fixation of the prosthesis. TALLADIUM ESPAÑA S.L. has clinical screws that satisfy that function.
- Clinical screws that have been in the mouth for more than 2 years, as it is understood that the patient has to have annual check-ups with the subsequent change of screws.
- The fault is due to normal wear and tear.

AMENDMENT OR SUSPENSION OF THE GUARANTEE

TALLADIUM ESPAÑA S.L. reserves the right to amend or withdraw these T&C at any time and without prior notification. Any modification or suspension shall not affect products already placed in patients.
